

COMPANY PROFILE

CV. PRISKILLA

ABOUT US

Who We Are

CV. Priskilla is a company operating in the kapok industry since 2007, with a primary focus on the production and export of kapok fiber and its derivative products. Based in Jepara, Central Java, Indonesia, the company has developed extensive experience in supplying natural-based products to international markets.

Over the years, CV. Priskilla has consistently exported its kapok products to various countries across Europe, Asia, and America. Export destinations include Japan, Italy, Poland, Netherlands, Germany, United States, United Kingdom, China, Belgium, Korea, Thailand, Portugal, Denmark, Vietnam, Malaysia, Australia, India, and Bangladesh. This wide market reach reflects the global trust in the company's product quality.

With a continuously growing production capacity, the company is capable of producing approximately 250 tons per month. The production composition includes superfine, fine, and CM full quality kapok. In addition, CV. Priskilla manufactures various finished products such as pillows, mattresses, bolsters, and other kapok-based items.

VISION

To become a trusted exporter of kapok fiber and kapok-based products in the global market through consistent product quality, reliable production capacity, and professional, sustainable service. ”

MISSION

To produce kapok products that consistently meet international quality standards.

To develop production capacity in order to fulfill global market demand sustainably.

To build long-term business relationships with partners and customers worldwide.

To maintain structured production processes from raw material handling to final packaging.

To optimize human resources and operations to improve efficiency and product quality.

OUR PRODUCT

Kapok Fiber & Kapok-Based Products

Kapok Fiber

CV. Priskilla produces kapok fiber in various quality grades tailored to market requirements. The production process is carried out systematically, starting from peeling, drying, and blower processing to ensure clean and ready-to-use fiber.

The kapok fiber is categorized into superfine quality, fine quality, and CM full quality with different production compositions. Each category is processed according to its specific standard, making it suitable for various industrial and household applications.

Kapok Products

In addition to raw fiber, CV. Priskilla manufactures a range of finished kapok-based products such as meditation cushions, sleeping bed pillows, mattresses, and bolsters for bedding, yoga, and furniture purposes.

These products are designed to provide comfort while utilizing the natural characteristics of kapok as a lightweight and functional material. The production process emphasizes material quality and finishing standards to meet both domestic and international market needs.
